Mir Nasrullah

Full-Stack Developer | Frontend-strong, building backend & AI

Quetta, Pakistan | nasrullahmir14@gmail.com | github.com/akmir98 | mir-dev.vercel.app

PROFILE

Full-stack developer with 3+ years of frontend experience building responsive, accessible interfaces, now extending into backend development with Node.js, Express and REST APIs. Delivered a live client website end to end as the sole developer, from design to deployment. Comfortable learning new tools quickly, and currently exploring AI-powered features and AI-assisted development workflows.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), React, Responsive Design, Animations
Backend	Node.js, Express.js, REST APIs
Database	MongoDB
Tools	Git, GitHub, VS Code, Vercel
AI tools	Claude, ChatGPT, DeepSeek, Gemini — for debugging, research and prototyping

SELECTED PROJECTS

Dr Physio Rehab — Client website

Live | Islamabad, Pakistan

- Designed and built a multi-page physiotherapy clinic website with service pages, a blog and an appointment booking / contact flow.
- Sole developer from design to deployment. Built with HTML, CSS and JavaScript, fully responsive.
  www.drphysiorehabonline.com

JavaScript Learning Hub

Personal project

- Interactive, anime-themed platform for learning JavaScript with an in-browser live code editor, curriculum tracker and practice arena.
- Built with JavaScript, HTML and CSS, and deployed on Vercel.
  javascript-hub.vercel.app

MIR.DEV — Portfolio

Personal project

- Animated portfolio with a filterable toolbox, client reviews, command palette (Ctrl/Cmd + K), interactive terminal and scroll-driven animations.
- Node.js / Express contact API using Nodemailer; fully responsive and accessible (reduced-motion support).

EXPERIENCE & GROWTH

Full-Stack Development — Self-directed

2025 – Present

- Shipped a real client website and an interactive learning platform while learning Node.js, Express and REST API design.
- Writing technical notes on the move from frontend to backend (see Blog on mir-dev.vercel.app).

Frontend Development — Self-taught

2023 – 2025

- Learned HTML, CSS, JavaScript and React from scratch through documentation and hands-on building.
- Built responsive, accessible interfaces focused on clean layouts and smooth interactions.
